

MUHAMMAD ANAS

Full Stack Developer (MERN | Node.js | Next.js)

+92 320 5950712 | ansafab68@gmail.com | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Developer experienced in building and deploying scalable Node.js/Express.js backend services and React.js frontend applications using TypeScript, Redux, and RESTful/GraphQL API design. Skilled in database schema design, query optimization, and data integrity across PostgreSQL, MySQL, and MongoDB. Hands-on cloud infrastructure (AWS, GCP, Azure, Terraform) and CI/CD experience. Has applied basic AI/NLP integrations (LLM APIs, prompt engineering) within fullstack projects. BS Computer Science graduate with strong foundations in OOP, data structures, and database design.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Python, C#, C++, HTML5, CSS3
Frontend:	React.js, Next.js (SSR/SSG), Redux, React Native, Tailwind CSS, Framer Motion
Backend:	Node.js, Express.js, Django, RESTful API & GraphQL, Microservices Design, JWT/OAuth, WebSockets
Databases & Data:	MongoDB, MySQL, PostgreSQL, SQL Server, NoSQL, Database Schema Design, Query Optimization, Data Integrity, ETL/data transformation, SDLC, Java
Tools & Cloud:	Git, GitHub, AWS, GCP, Azure, Linux, Terraform, Docker, CI/CD, Unity / Unreal Engine, AI Coding Tools (GitHub Copilot)
AI/ML Exposure:	NLP, LLM APIs (basic integration), Prompt Engineering, Transformers (coursework)

PROFESSIONAL EXPERIENCE

Full Stack Developer | POA Solutions

March 2025 – Jan 2026

- Developed and deployed 5+ full-stack web applications using React.js (frontend) and Node.js (backend), reducing manual processing time by 30% across internal teams
- Built responsive, accessible React.js UIs with TypeScript and Redux, contributing frontend features across multiple project deliveries
- Designed scalable Node.js/Express.js backend services with RESTful and GraphQL APIs; integrated with React frontends via Axios for consistent, reliable data flow
- Owned database schema design and data transformation logic across PostgreSQL, MySQL, and MongoDB stores; enforced data integrity and implemented JWT-based authentication and authorization to secure endpoints
- Maintained clean, self-documenting code with consistent structure and inline comments to support seamless engineer handoffs; debugged and optimized applications for performance and cross-browser compatibility
- Collaborated with product stakeholders and cross-functional teams to translate domain requirements into reliable technical solutions; participated in code reviews and contributed to engineering standards across 5+ deliveries
- Leveraged AI coding tools (GitHub Copilot) to accelerate development velocity, critically reviewing and fully owning all generated output before merging to maintain codebase quality

DevOps & Cloud Infrastructure Intern | SZABIST Lab

Nov 2024 – Feb 2025

- Gained hands-on experience provisioning resources across AWS, GCP, and Azure cloud platforms
- Wrote Terraform infrastructure-as-code scripts; maintained CI/CD pipelines while collaborating with senior engineers on cloud automation

KEY PROJECTS

AI-Powered Freelance Marketplace | Full Stack (MERN) | [Live Demo](#)

- Built a client-freelancer matching platform with automated workflows and real-time collaboration features using scalable Node.js/Express.js backend services, RESTful APIs, and MongoDB; integrated basic AI-assisted matching/recommendation features

AI-Powered Learning Platform | Full Stack (MERN) | [Live Demo](#)

- Built a multi-user learning platform supporting multiple learning modules with optimized load performance, MongoDB-backed data storage, and basic AI-assisted content features

Personal Portfolio Website | React.js | [Live Demo](#)

- Designed and developed a personal portfolio site showcasing projects, technical skills, and professional experience with a responsive, modern React.js UI

Banking Management System | C++

- Built a banking system with a loan module and transaction verification using OOP and data structures, including test cases covering deposit, withdrawal, and loan validation rules

EDUCATION

BS Computer Science — Completed 2026

CGPA: 3.31 / 4.0

Shaheed Zulfikar Ali Bhutto Institute of Science and Technology (SZABIST), Islamabad

Coursework: OOP, Data Structures, Algorithms, DBMS, Software Engineering, AI, Operating Systems, Game development concepts, Problem-solving, Web Development
